36 Batik Pekalongan Street, RT 06 RW 08, Bandung City, 40123

I am a Full Stack Web Developer with experience in developing management information systems, including pharmacy and spare part management systems.

Education

Universitas Katolik Parahyangan  - 94 Ciumbuleuit Street, Bandung

Bachelor of Informatics (Computing Science)

Jul 2019 - Feb 2025

Project Experience

- Full-stack Web Developer

Adora Pharmacy Information System

Developed a Pharmacy Management Information System to streamline drug inventory management, cashier transactions, stock opname, and financial reporting.

- Developed financial methods to manage operational costs.
 - Improved stock management accuracy by implementing an automated stock opname system that identifies stock discrepancies.
 - Implemented data security systems to protect transaction, inventory, and financial information from unauthorized access.
 - Developed financial reporting features that present income, expenses, and net profit data.

Mar 2023 - Mar 2024
- Full-stack Web Developer

Spare Part Management Information System

Developed a Spare Part Management Information System to efficiently record, manage, and monitor spare parts.

- Implemented a search and data filtering system to facilitate the lookup of spare parts based on name, number, or unique code.
 - Applied data security measures to protect spare part information from unauthorized access.
 - Developed reporting features that present spare parts data in predefined formats.

Nov 2024 - Feb 2025
- Full-stack Web Developer

Pharmacy Information System

Developed a Multi-Branch Pharmacy Information System that enables the management of multiple pharmacies within a single integrated system.

- Designed branch-specific stock management to ensure each branch maintains its own item inventory.
 - Implemented real-time cashier transaction features supporting drug sales recording, payment processing, and automatic receipt printing.
 - Developed financial reporting features for both individual branches and centralized monitoring to track income, expenses, and profit of each pharmacy.
 - Applied low stock and expiration date notification systems to enable pharmacies to take timely actions.
 - Developed a dashboard displaying visualizations of transactions, drug sales trends, and the performance of each branch.

Jan 2025 - Apr 2025

Organizational Experience

- Student Activity Unit PORTRAIT Parahyangan Catholic University

Publication and Documentation Division

- Creating publication content to be displayed on POTRET's Instagram account.
 - Managing POTRET's Instagram social media.
 - Collaborating with other teams or divisions.
 - Preparing documentation reports.

Aug 2020 - Oct 2022

Abilities, Achievements & More

- Webinar Speakers**  (2024): Speaker at the National-level Informatics Webinar Series
- Soft Skills:** Problem-solving, time management, teamwork, critical thinking, attention to detail, and quick adaptability to technology.
- Hard Skills:** Frontend Development (React.js, Next.js, Tailwind CSS, Ant Design), Backend Development (Node.js, Express.js), Database Management (PostgreSQL, MySQL), API Development (REST API, Axios, Postman), Authentication & Security (NextAuth, JWT, Role-based Access Control), Data Visualization (Chart.js, Recharts), Version Control & Collaboration (Git, GitHub), Testing & Debugging (Console Debugging, Postman API Testing), Document Processing (SheetJS, Excel Automation), Deployment & Hosting (Vercel, Railway, Docker).
